

# Kensol 36

The Kensol 36 is our largest and most powerful hand operated press. This machine is available with a 5 x 6 Inch, 6 x 8 Inch, or 6 x 12 Inch impression area.

The 5 x 6 Inch version has a side to side roll leaf attachment. The 6 x 8 Inch and 6 x 12 Inch units have a front to back leaf attachment. (Shown above is the popular 6 x 8 Inch machine.) The double-toggle linkage system will develop up to three tons of head pressure.

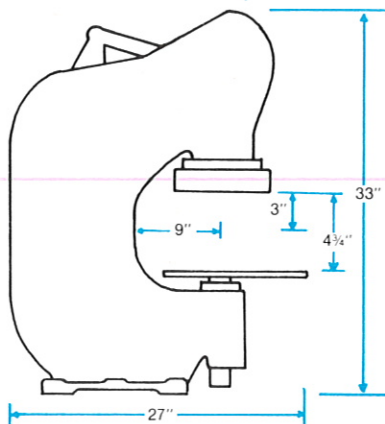

The Kensol 36 has a long three inch head stroke so that work can be fed and taken away quickly.

A sliding table is provided for makeready purposes. This work table can be raised or lowered to accommodate items up to two inches high.

The Kensol 36 can be converted to the air-operated 36T at any time, in your own plant.

Photographs of type and die holders are shown on the reverse side.
