## ADDITIONAL FEATURES AND BENEFITS

The Kwikprint MODEL 55 is easy to use and will print on a wide variety of products. This machine is designed to print on flat surfaced products like award ribbons, wedding ribbons, plastic badges, acetate, stationery, napkins, cards, document folders, leather, bibles, wallets, pencils and much more. The MODEL 55 is made from one solid casting making it smaller, lighter and more mobile than our other machines. At 50 pounds it is the perfect table top machine for any small business and can be easily transported from home to office. Even though the machine itself is smaller than our other machines, it has the same 18 square inch imprint area. However, most customers who purchase the MODEL 55 choose the 1" x 5 $\frac{3}{4}$ " or the 2" x 5 $\frac{3}{4}$ " typeholders. The following features have made the Kwikprint MODEL 55 the most popular hot stamping machine for both retailers and specialty businesses: **Tiltable Type Holder** – Front loading and self centering typeholders allow you to set type or dies right into the machine for fast and easy set up; **Optional Automatic Rollfeed** – advances the foil after each imprint; **Large Work Platform** – 12" x 12" square with front to rear centering movement; **Smaller Work Platform** for printing on baggage and small books; **Large Imprint Area** – 18 square inches (2" x 9"); **Heavy duty** solid cast aluminum castings; **Nine Inch Throat Depth** – allowing an uninhibited imprint area in the center of an 18 inch piece; **Lighter weight** mobile printing unit. These features combined with the industrial durability of a Kwikprint have provided our customers with decades of profit making service. No other machine in its class or near its class can compare with the Kwikprint's strength, versatility and ease of operation.

**SPECIFICATIONS:** Typeholder will take either a 5 $\frac{3}{4}$ " or 9" line of type. Line width depends on the typeholder selected with the machine. Top platform has 12" x 12" lineboard with 1/4" precision dimensions for easy centering. Lower platform is 3 $\frac{3}{4}$ " x 7". Throat depth is a full 9". Machine base is 12" wide x 16" deep. Machine height is 22". Weight is approximately 50 lbs. / 65 lbs. crated.
